

Bag-Dispatcher

Quality optimization ■ Space-saving design ■ Time-saving solution

Characteristics:

- ▶ Space saving
- ▶ Easy to clean
- ▶ Lockable
- ▶ Material-touching parts are made from stainless steel (VA)
- ▶ Automatic bag-opening
- ▶ Coarse filtering against pollution through bag-remains
- ▶ Drain through suction or integrated cell-wheel-feeder

The Component System

Quality criteria:

- ▶ Triangular knife guarantees automatic bag-opening
- ▶ Coarse filter obviates pollution through bag-remains
- ▶ Coarse filter and triangular knife can be removed for cleaning
- ▶ A conical drain makes a 100 % discharge possible

- ▶ Bag-discharge is also practicable with integrated cell-wheel-feeder
- ▶ Comfortable working-position
- ▶ By pulling up the bag-ends, the content will be completely drained

We recommend the use of a scissor lifting table or a vacuum grab for bag-drain.
